

School Based Rehabilitation Services at Your School!

ErinoakKids provides School Based Rehabilitation Services (SBRS) at your child's school.

This includes occupational therapy (OT), physiotherapy (PT) and speech therapy.

Visit our website to learn more!

Speech Language Pathology Resources

Speech learning videos to help support you and your family!

Video topics include: articulation, building imitation, how sounds are made, how to practice at home, strategies for clear speech, stuttering and more!

www.erinoakkids.ca/speech-learning-videos

Physiotherapy Resources

Access our collection of handouts and webinars to learn more about typical gross motor development and when to consider help. Review developmental milestones that are important age-specific skills for children six and over.

Accessing School Based Rehabilitation Services starts at school!

If you think your child requires support from a therapist to participate in school activities, discuss these concerns with your child's teacher.

The school team will provide next steps on accessing services, which may include discussion with the SBRS OT/PT or school board Speech Language Pathologist (SLP).

Please visit erinoakkids.ca for helpful resources and online workshops you may like to attend.
